

ABRAHAM ADDISU

Mobile App Developer | Android (Kotlin) & Cross-Platform (Flutter)

+251-963048258 | abrahamaddisu217@gmail.com | Addis Ababa, Ethiopia | linkedin.com/in/abraham-addisu

SUMMARY

Mobile App Developer with 2+ years shipping production applications across native Android (Kotlin, Jetpack Compose) and cross-platform Flutter. Experienced designing offline-first architectures, bilingual and localized user experiences, and full products from concept through Play Store release. Active open-source contributor, maintaining a 5-package Flutter toolkit used by other developers. Comfortable working across the stack, including UI implementation, REST API integration, and cloud services.

TECHNICAL SKILLS

Languages: Kotlin, Dart, Java, Python, C++

Android: Jetpack Compose, XML Views, ViewModel, Room, WorkManager, DataStore, Navigation

Cross-Platform: Flutter (iOS & Android), Hive local storage

Async & Reactive: Coroutines, Flow, StateFlow, LiveData

Backend & Cloud: Firebase (Auth, Firestore, FCM, Storage), REST APIs, JSON-RPC

Tools: Git, GitHub Actions, Gradle (Kotlin DSL), Figma, Postman

EXPERIENCE

Full Stack Engineer (Android Focus) - Medco Technology Solutions

Apr 2026 – Present

Addis Ababa, Ethiopia · On-site

- Develop and ship features for client-facing medical and insurance applications using Kotlin and Jetpack Compose
- Collaborate with product and design teams to deliver scalable, production-ready mobile solutions

iOS Flutter Developer Intern - BrainBite (EdTech) - Remote, Netherlands

Oct 2025 – Jan 2026

- Built and enhanced cross-platform features in Flutter for a children's educational platform
- Integrated ElevenLabs AI voice services and contributed to multilingual, localized user experiences
- Collaborated asynchronously with backend and UI/UX teams across time zones

Mobile App Developer - Daga Meter Ride (Client Project) - Bahir Dar, Ethiopia

Sep 2025 – Jan 2026

- Built and published passenger and driver Android apps live on Google Play
- Implemented Firebase Auth, real-time ride logic, and FCM push notifications; owned the full release cycle

Android Developer - Self-Employed - Bahir Dar, Ethiopia

Jul 2024 – Present

Hybrid

- Designed and built production Android apps using Kotlin, Jetpack Compose, Firebase Auth, Room, and SharedPreferences
- Delivered Addis 360, an offline-first civic directory with optimized Amharic/English smart search and zero-latency filtering
- Integrated REST APIs and built an Odoo ERP mobile inventory scanner using JSON-RPC

Embedded Systems Developer - BiTec, Bahir Dar University

Dec 2024 – Oct 2025

- Built HAKI, a real-time power monitoring system with sensor integration, TFT display, and SD-card logging

OPEN-SOURCE & INDEPENDENT PROJECTS

ethio_dev_kit - Personal Open-Source Project

2026

- Authored and published a 5-package Flutter/Dart toolkit for Ethiopian developers on pub.dev (MIT licensed): calendar conversion, bilingual typography, phone/currency validators, Amharic speech-to-text, and a dynamic holiday calculator

FaydaHealth - CoBuild Ethiopia AI Hackathon

2025

- Co-built an AI-powered health record system in Flutter; placed 2nd in a national hackathon

EDUCATION

Bachelor of Software Engineering - Bahir Dar University

2023 – 2027 (in progress)

Focus: Mobile Application Development, Software Architecture, Database Design, System Analysis

Android Developer Fundamentals - Udacity

2024

CERTIFICATIONS & AWARDS

- Hult Prize 2026 - Ethiopia National Finalist (top 8 of 600+ university teams)
- IBM SkillsBuild - AI Literacy & Data Literacy
